

FOR IMMEDIATE RELEASE

ScImage releases updated echo reporting based on new ASE 2015 quantification standards

Rapid development meant to respond to new criteria guidelines and support cardiologists reporting requirements

Los Altos, CA – March 2, 2015: ScImage announced the immediate availability and deployment of updated quantification metrics based on guidelines published in January, 2015 jointly by the American Society of Echocardiography (ASE) and the European Association of Cardiovascular Imaging (EACVI).

One of the industry's most comprehensive and widely used echocardiography reporting platforms, PICOM SRI structured reporting offers the flexibility of customer driven customization while maintaining accreditation specific reporting requirements, industry association standards and offering evidence based results.

ScImage's founder and CEO, Sai P. Raya, Ph.D., stated, "It is especially important that we respond to the rapidly changing healthcare landscape both quickly and responsibly, to help our clients perform to their high expectations. Our flexible system architecture and agile processes allow us to provide our customers with the very best, up to date products and services."

The new guidelines support the latest cardiac chamber quantification standards, establishing new normal values for all four cardiac chambers, including three-dimensional echocardiography and myocardial deformation. New results were established on the basis of a substantially larger population of normal subjects, improving the reliability of the reference values.

About ScImage

ScImage, Inc. is a privately held company headquartered in Los Altos, California. Founded in 1993, ScImage provides cost effective options to institutions challenged with disparate and non-integrated imaging systems. ScImage's PICOM365 technology consolidates multi-department PACS, diagnostic reporting, VNA, enterprise viewing and collaborative reading. This single-database platform can be implemented on premises, in the cloud or both. ScImage's unique approach incorporates Radiology, Cardiology, Women's Health, clinical documents, and other "ologies" into a seamless diagnostic application suite. For more information about ScImage and the PICOM365 family of products, visit their website at www.scimage.com or call 1-866-SCIMAGE.
