

FOR IMMEDIATE RELEASE

## HIMSS formula for success

PACS + VNA + EMR + CIS = \$\$\$

**Los Altos, CA – April 6, 2015:** Enterprise imaging vendor ScImage, Inc. will show HIMSS 2015 attendees how it seamlessly integrates PACS, EMR and other clinical information systems and stores data in a vendor neutral archive (VNA) to create a full Electronic Health Record. The company has employed this formula at numerous sites across the nation using a single-platform solution that features a user-accessible database for all clinical systems, flexible department workflow, a multi-tiered archive, and more.

“The challenge at HIMSS is not just being a ‘me too’ company,” said Richard Taylor, Director of National Sales for ScImage. “We have a host of features, like ‘no forklift upgrades’ that allows a user to extend the life of their existing hardware while enjoying the latest software releases. This is unique to the industry and is something that is of great interest to the IT community in an age of shrinking budgets. Anything that can give end users added value without added cost is a major plus.”

Integrating disparate clinical information systems (CIS) into an EHR is always a challenge, yet the software ScImage developed for its VNA over a decade ago allows the company connect all major EMR and CIS vendors and even competing clinical PACS systems. This, in turn, allows facilities to create the full EHR that is dictated by Meaningful Use quicker and more efficiently and generate additional revenue through it.

“The two recurring trends we are seeing is how to make the more of what a facility has without spending more money, and achieving MU with the least amount of pain,” said Taylor. “We have also seen facilities wanting more data analytics to determine how they can optimize their existing operations. Because of that need, we have expanded our analytics package to address operational statistics, outcomes, and a data dashboard, all of which are fully customizable.”

Learn more about how ScImage is transforming enterprise imaging at HIMSS in booth 1822, South Hall. For additional information on setting up an appointment or demo during the show or afterwards, contact ScImage at 866-724-6243 or via e-mail at [info@scimage.com](mailto:info@scimage.com).

**About ScImage**

ScImage, Inc. is a privately held company headquartered in Los Altos, California. Founded in 1993, ScImage provides cost effective options to institutions challenged with disparate and non-integrated imaging systems. ScImage's PICOM365 technology consolidates multi-department PACS, diagnostic reporting, VNA, enterprise viewing and collaborative reading. This single-database platform can be implemented on premises, in the cloud or both. ScImage's unique approach incorporates Radiology, Cardiology, Women's Health, clinical documents, and other "ologies" into a seamless diagnostic application suite. For more information about ScImage and the PICOM365 family of products, visit their website at [www.scimage.com](http://www.scimage.com) or call 1-866-SCIMAGE.
