

FOR IMMEDIATE RELEASE

ScImage's PICOM365 Enterprise PACS validated by Veterans Administration

Enterprise PACS for cardiology and radiology workflow now supported for HL7 Communications with VistA

Los Altos, CA – May 11, 2015: Enterprise Picture Archiving and Communications System (PACS) vendor ScImage, announced that it has completed another significant milestone within the framework of the Veterans Administration (VA) Health System, receiving validation for its PICOM365 Enterprise PACS as "Supported for HL7 Communication" with VistA Imaging.

Having already achieved DIACAP accreditation (DoD security validation) and DIN-PACS (VHA and DoD purchasing contract), ScImage is one of a select few cardiology and radiology PACS vendors certified as primary government contractors for turnkey operations.

The VA's VistA Imaging system integrates clinical images, scanned documents, and other non-textual data into the patient's electronic medical record. VistA Imaging can capture and manage many different kinds of images, including clinical images from endoscopy, pathology, dermatology, cardiology, radiology and nuclear medicine images, scanned clinical and administrative documents and ECG waveforms.

ScImage has received an official ATO (Authorization to Operate) and ATC (Authorization to Connect) from the Department of Defense (DoD) Information Assurance Certification and Accreditation Process (DIACAP) enabling DoD military service branches to implement ScImage's PICOM365 PACS at DoD medical treatment facilities around the globe.

With the diagnostic viewing and reporting capabilities of ScImage's PICOM365 Enterprise PACS, reading and reporting of all medical imaging exams is consolidated within a single platform, which can boost productivity while simplifying operations and minimizing support costs. PICOM365's scalable, web-enabled platform integrates easily with complex workflow environments and complies with HL7, DICOM and IHE standards.

ScImage's PACS solution for enterprise imaging and distributed workflow are in use by the U.S. Government's Veterans Integrated Service Networks, the U.S. Navy, U.S. Army and U.S. Air Force, and many dignitary healthcare organizations in the U.S.

About ScImage

ScImage, Inc. is a privately held company headquartered in Los Altos, California. Founded in 1993, ScImage provides cost effective options to institutions challenged with disparate and non-integrated imaging systems. ScImage's PICOM365 technology consolidates multi-department PACS, diagnostic reporting, VNA, enterprise viewing and collaborative reading. This single-database platform can be implemented on premises, in the cloud or both. ScImage's unique

FOR IMMEDIATE RELEASE

approach incorporates Radiology, Cardiology, Women's Health, clinical documents, and other "ologies" into a seamless diagnostic application suite. For more information about ScImage and the PICOM365 family of products, visit their website at www.scimage.com or call 1-866-SCIMAGE.
