

FOR IMMEDIATE RELEASE

## **ScImage Launches Latest Version of its Web-based PACS, PICOM365.com, at RSNA**

*Showcases Industry Leading Enterprise Imaging Solutions*

**CHICAGO, RSNA Booth 3129, November 28, 2016** - ScImage, Inc. will showcase updates to its industry leading Enterprise Imaging solutions designed to provide seamless workflow during patient imaging communication at RSNA, including the launch of latest version of its hybrid Cloud PACS, PICOM365.com, at the 102nd Annual Radiological Society of North America (RSNA) meeting, November 27-December 2, 2016.

Providing integrated workflow that is fully functional on premises, in the cloud or both, PICOM365.com leverages Microsoft Azure Cloud for security, privacy, scalability and resiliency. PICOM365 brings flexible, efficient, secure and location-independent workflow paradigms to institutions of varying sizes saddled with legacy VPN centric topologies.

ScImage has provided flexible exchange and dynamic workflow between disparate PACS, EMR, and departmental information systems for more than 20 years. The delivery of quality care doesn't rely on where the image is acquired or where it is stored; it is dependent on the ability of the clinician to access patient data from anywhere and share it with the care team – getting the right patient information to the right clinician, anywhere and at anytime.

“Delivering seamless workflow for patient imaging communication, the ScImage Enterprise Imaging Solution, strikes the right balance between what should be on premise and what can be in the cloud. The concept of ubiquitous imaging from a department workflow to Enterprise EHR can easily be made routine with PICOM365,” said ScImage’s founder, Sai Raya, PhD.

### **About ScImage**

ScImage, Inc. is a privately held company headquartered in Los Altos, California. Founded in 1993, ScImage provides cost effective options to institutions challenged with disparate and non-integrated imaging systems. ScImage’s PICOM365 technology consolidates multi-department PACS, diagnostic reporting, VNA, enterprise viewing and collaborative reading. This single-database platform can be implemented on premises, in the cloud or both. ScImage’s unique approach incorporates Radiology, Cardiology, Women’s Health, clinical documents, and other “ologies” into a seamless diagnostic application suite. For more information about ScImage and the PICOM365 family of products, visit [www.scimage.com](http://www.scimage.com) or call 1-866-SCIMAGE.
