## ScImage Awarded U.S. Government's DIN-PACS IV Contract

*Contract Includes Entire PicomEnterprise Solution Supporting All Imaging Specialties*

**Los Altos, CA – August 4, 2017** - ScImage, Inc., a leading provider of Enterprise PACS solutions, has been awarded a new DIN-PACS IV (Digital Imaging Network/Picture Archiving and Communications System) contract by the U.S. Government. The contract is potentially valued up to \$400,000,000, and the terms include one five-year base period and one five-year option period.

ScImage's PicomEnterprise seamlessly accommodates various imaging specialties with a single database-driven core framework, setting it apart from other PACS vendors. Modality-specific image visualization and reporting methodologies, along with end-to-end encrypted, location independent secure data access based on user roles, allow the solution to deliver scalable functionality with minimal infrastructure. Natively built result distribution mechanisms make PicomEnterprise an ideal companion to any EHR.

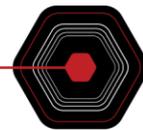

"ScImage is pleased to have provided comprehensive PACS solutions to leading military treatment facilities, resulting in better workflow and patient care for our military personnel, veterans, and their families," said ScImage's founder Sai Raya, Ph.D. "ScImage has a proven track record for responding quickly to customers' needs and rapidly deploying secure imaging systems that support collaborative workflow across the enterprise."

ScImage has been providing products and services under a previous DIN-PACS contract for the past three years, including Cardiology PACS installations at six Department of Defense medical facilities. ScImage's prior contracts have included projects for the U.S. Department of Veterans Affairs (VHA), the U.S. Air Force School of Aerospace Medicine, and Indian Health Services.

### **About ScImage**

Founded in 1993, ScImage remains a customer-first, private company with a mission to provide innovative enterprise imaging solutions to the healthcare industry. ScImage's unique single-database PICOM365 enterprise platform delivers end-to-end imaging workflow for Cardiology, Radiology, Women's Health, Orthopedics, Ophthalmology and more. Scalable from a single physician practice to multi-hospital enterprises, PICOM365 is delivered on premises, in the cloud, or as hybrid - based on user choice. The perfect synchrony created between on-site and cloud resources allows PICOM365 to provide secure VPN-less image exchange solutions among legacy silo systems, cloud users, and various EHR systems.
