ScImage Announces PicomPassport

Allows organizations to easily import external patient exams into any PACS

Los Altos, CA – November 25, 2017 – ScImage, Inc. is pleased to introduce PicomPassport at the Radiological Society of North America’s 103rd Annual Scientific Assembly. PicomPassport is a new technology that leverages the power of PICOM365’s Azure-based Cloud to simplify the importing of external patient exams into any PACS.

With PicomPassport, any external entity (a facility, physician or patient) can initiate an exam upload request. Upon obtaining an upload authorization electronically, the entity can then drag and drop exam data for instant availability on Picom365.com. PicomPassport’s Cloud-based functionality securely sends uploaded exams to local PACS following an intelligent conflict resolution process and provides secure ownership exchange within existing security frameworks.

“Frictionless importing of external patient exams into departmental PACS remains a sticky process for most healthcare organizations, despite being a vital functionality that is required to avoid repeat procedures, ensure dose minimization and improve patient care,” said Sai Raya, PhD, CEO of ScImage, Inc. “We are proud to present an efficient and cost-effective solution that addresses these issues.”

To learn more, visit ScImage in booth 2500 at this year’s Radiological Society of North America’s 103rd Annual Scientific Assembly and Annual Meeting held in Chicago, IL.

About ScImage

Founded in 1993, ScImage remains a private, customer-first company with a mission to provide innovative enterprise imaging solutions to the healthcare industry. ScImage’s unique single-database PICOM365 enterprise platform delivers end-to-end imaging workflow for Cardiology, Radiology, Women’s Health, Orthopedics, Ophthalmology and more. Scalable from a single physician practice to a multi-hospital enterprise, PICOM365 is customizable and can be delivered on-premise, in the Cloud, or as a hybrid. The perfect synchrony created between on-site and Cloud resources allows PICOM365 to provide secure VPN-less image exchange solutions among legacy silo systems, Cloud users, and various EHR systems.
