

YEARS OF IMAGING INGENUITY

FOR IMMEDIATE RELEASE

## ScImage Celebrates 25th Anniversary

Los Altos, CA – January 31, 2018 – ScImage, Inc., a leading provider of Enterprise PACS solutions, is celebrating 25 years of providing innovative imaging and workflow solutions to the healthcare industry.

Sai Raya, PhD, founded the company in 1993 with private-labeled filmless angiography, 3D intravascular ultrasound and coronary calcium scoring software systems. During the late 1990s, the company pioneered the concept of a patient-centric approach to clinical imaging to eliminate shortcomings of siloed departmental solutions. ScImage introduced PICOM in 2001 with the first ever Cloud-based PACS offering.

“Our steady and organic growth from a 2-person start-up is a direct outcome of our commitment to providing the highest quality imaging products and excellent service to our customers and end-users,” noted Madvi Raya, co-owner and CFO. “Apart from contributing to the medical industry by developing innovative and cost-effective product lines, listening to our customers continues to be our company culture. I am grateful to our employees for retaining our founding values!”

The company’s suite of product offerings has expanded over the years in anticipation of industry changes and customers’ evolving business needs. Picom365.com has become the home for hundreds of institutions for clinical imaging and reporting workflow, secure image exchange for interoperability, and cloud storage for disaster recovery. Over the years, the on-premise PicomEnterprise with its Cloud counterparts, has become a powerful platform to handle end-to-end imaging workflows for most departments within the health enterprise. Native support for waveforms and non-imaging data, ability to handle complex ordering environments and the ability to interface to any possible EHR system are the unique strengths of PICOM365. Specialty based reporting methodologies along with advanced visualization are seamlessly delivered anywhere to highly mobile physicians of the modern imaging practice.

“Over the past 25 years, ScImage has consistently pushed the envelope in enterprise imaging workflow with our characteristic out-of-the-box thinking. Our core belief in one satisfied customer at a time and long term good relationships with our partners became our investment vehicle to build a solid company with a wealth of intellectual property and with no external investment.” remarked Sai Raya, PhD, Founder and CEO of ScImage, Inc. “It gives me great pride to join our valued employees, customers and partners in celebrating this milestone anniversary.”

Today, hundreds of healthcare institutions of all sizes use PICOM365 on-premise and in the Cloud. ScImage continues to thrive with a customer-centric mindset, focused on delivering customized enterprise imaging solutions that will meet the changing needs of the healthcare IT landscape.

### **About ScImage**

Founded in 1993, ScImage remains a private, customer-first company with a mission to provide innovative enterprise imaging solutions to the healthcare industry. ScImage’s unique single-database PICOM365 enterprise platform delivers end-to-end imaging workflow for Cardiology, Radiology, Women’s Health, Orthopedics, Ophthalmology and more. Scalable from a single physician practice to a multi-hospital enterprise, PICOM365 is customizable and can be delivered on-premise, in the Cloud, or as a hybrid. The perfect synchrony created between on-site and Cloud resources allows PICOM365 to provide secure VPN-less image exchange solutions among legacy silo systems, Cloud users, and various EHR systems.
