ScImage and Carestream Health Expand Reseller Agreement

Companies to develop cardiology PACS solution for international markets

Los Altos, CA – November 24, 2008 – ScImage has expanded its agreement with Carestream Health., Inc., to include joint R&D initiatives aimed at developing a cardiology information solution that Carestream Health's sales representatives can begin selling in Europe and other parts of the world in mid 2009.

Since October of 2007, sales professionals from Carestream Health have been selling ScImage's PicomEnterprise solution—with built-in capture and visualization tools—for integration with CARESTREAM Information Management Solutions (IMS) in the U.S. and Canada. A feature-rich cardiology solution featuring the data management capabilities of CARESTREAM IMS combined with the benefits of PicomEnterprise may help improve patient outcomes, increase efficiency and reduce departmental costs.

ScImage's powerful web-based cardiology software solution—PicomEnterprise—enables cardiology departments, outpatient cardiology clinics, and private-practice cardiologists to use a single database to manage, distribute and safeguard cardiac information gathered at various points of care. PicomEnterprise decreases cost and increases productivity by providing a single point of access to echo, cath, ECG, vascular, nuclear cardiology and hemo-dynamic reports.

CARESTREAM IMS is a scalable platform for the management and storage of digital medical images and information offering on-site or remotely hosted storage solutions. CARESTREAM IMS can be scaled to meet the needs of small-to-large hospitals and medical practices as well as regional or national healthcare information systems—all within the same software framework.

The enhanced agreement comes as the two companies are completing their first year of collaboration and co-marketing. "With several contracts for ScImage's cardiology PACS integrated with CARESTREAM IMS already signed, we are looking forward to continued growth in our domestic business with Carestream Health while expanding our reach into other established markets around the world," said ScImage Founder and CEO, Sai P. Raya, Ph.D.

"Expanding our joint development efforts positions us to build on an already successful combination of CARESTREAM Information Management Solutions and PicomEnterprise," said Carestream Health's HCIS Business Manager, Joseph P. Maune. "Our goal is to potentially deliver the same information

management efficiencies we are seeing in U.S. healthcare providers that have adopted this solution to other healthcare organizations around the world."

About ScImage

Founded in 1993, ScImage, Inc. is a privately held company, headquartered in Los Altos, California. ScImage is a global leader in the development of advanced medical imaging technology and workflow solutions for radiology and cardiology. ScImage's mission is to be the True Enterprise PACS Company by providing a shared infrastructure solution for all imaging intensive departments throughout the healthcare enterprise. At the center of the ScImage's image and information management system is PICOM, a web server-based technology that works independent of modalities and departments to seamlessly deliver multi-modality image and information management, archiving, offsite disaster recovery and telemedicine functionality. ScImage®, PICOM®, NetraMD®, ForeverOnline®, PicomOnline™, HyperStreaming™, OnDemand TelePACS™ and EPF™ are trademarks or registered trademarks of ScImage, Inc. For more information about ScImage and the PICOM family of products, visit their website at www.scimage.com or call 1-866-SCIMAGE.

About Carestream Health, Inc.

Carestream Health, Inc., is a leading provider of dental and medical imaging systems and healthcare IT solutions; molecular imaging systems for the life science research and drug discovery/development market segments; and x-ray film and digital x-ray products for the non-destructive testing market. The company was formed in 2007 when Onex Corporation (TSX: OCX.TO) purchased Eastman Kodak Company's Health Group.
