

FOR IMMEDIATE RELEASE

ScImage Receives Canadian Medical Device Licence for PicomEnterprise

Company to begin taking orders immediately for Enterprise PACS in Canadian Markets

Los Altos, CA – October 21, 2009 – ScImage, a leading enterprise imaging and informatics company, announced today that it has received a Class II Medical Devices Licence from Health Canada. The issued licence clears ScImage's Enterprise Imaging Solution, PicomEnterprise, for distribution in Canada.

ScImage's PicomEnterprise addresses end-to-end cardiology, end-to-end radiology, anywhere diagnostic reporting, zero footprint EMR image content management, multi-PACS archive and teleradiology. The company also specializes in custom engineering projects for facilities searching for a tailored solution. PicomEnterprise delivers a common infrastructure with diagnostic reading tools for all radiology exams, ECG interpretation, echocardiography, nuclear medicine and cardiac cath. The solution scales to meet the needs of a small single location to a large geographically dispersed multi-site solution and supports vendor-neutral, enterprise-wide, centralized archiving for all imaging disciplines and related clinical information and documents.

Radiologists using PicomEnterprise will enjoy a variety of visualization tools, workflow triggers, and streamlined access to prior images and reports. Cardiologist will appreciate the patient-centric access to ECG, Holter, echocardiography, nuclear cardiology, cardiac cath, CTA and even chest X-ray. Administrators will benefit from the web-based tools for administration, quality assurance and more.

PicomEnterprise features sophisticated pervasive reporting capabilities with built-in voice recognition based self-reporting, voice capture transcription based reporting and comprehensive structured reporting. This reporting platform allows physicians to easily create and signoff on reports in a variety of ways from any location.

The company offers a super-scaled version of PicomEnterprise for offsite disaster recovery, business continuity and telemedicine purposes through its hosted datacenter solution called PicomOnline. This solution is proven in its ability by handling millions of studies per year with complete HIS/EMR integration, conflict resolution, reporting, diagnostic and non-diagnostic image access and web distribution with intelligent prior pre-fetching and delivery to existing site-specific PACS.

FOR IMMEDIATE RELEASE

ScImage also delivers enterprise imaging content to other information systems within the health system with a unique zero-footprint, zero-install HIPAA compliant viewing mechanism called PicomWeb. Delivery of images, reports, waveforms and documents using this light viewer supports improved information exchange and interoperability among healthcare information systems. Referring physicians and casual users will have zero-install access to patient information and IT Managers will appreciate its ease of administration.

“Receiving our Canadian Medical Device Licence unlocks a market with great potential,” stated Sai P. Raya, Ph.D., ScImage Founder and CEO. “We are excited to begin distributing our solutions in Canada.”

About ScImage

Founded in 1993, ScImage, Inc. is a privately held company, headquartered in Los Altos, California. ScImage is a global leader in the development of advanced medical imaging and workflow solutions for radiology, cardiology and electronic medical record content management. As a true enterprise PACS company, ScImage's mission is to provide a shared infrastructure solution for all imaging intensive departments throughout the healthcare enterprise. At the center of the ScImage's technology is PICOM, a web service technology that works independent of data types, modalities and departments to seamlessly deliver multi-modality image and information management, multi-PACS archiving, offsite disaster recovery and telemedicine functionality. ScImage[®], PICOM[®], NetraMD[®], ForeverOnline[®], PicomOnline[™], PicomWeb[™], HyperStreaming[™], OnDemand TelePACS[™] and EPF[™] are trademarks or registered trademarks of ScImage, Inc.
