USAF Engages ScImage to Launch Ambitious Global Cardiology Network

Comprehensive, USAF-wide system deployed for categorization, visualization and interpretation of full diagnostic quality cardiac studies.

Los Altos, CA – March 30, 2011 - ScImage announced the launch of an ambitious project to assist the United States Air Force, Aeromedical Consultation Service (ACS) with the collection, assessment and reporting tools necessary to expedite cardiovascular decisions for rated aviators, while concurrently reducing flight disqualification delays.

As defined by the USAF, the project scope includes the Creation of a USAF-wide, comprehensive digital system for the categorization, visualization and interpretation of full diagnostic quality cardiac studies.

Using a secure, DIACAP accredited PicomEnterprise PACS from ScImage, Inc., flight clinics worldwide can electronically transfer exams to ACS for rapid assessment. Inbound exams are reconciled with MilPDS and subsequently presented to specialists along with relevant priors for primary reading.

With this new web based PACS system from ScImage, ACS physicians report their observations electronically, providing quick decision support for the disposition of flight personnel. Now, highly trained Air Force aviators can be rapidly evaluated and re-deployed to operational status in hours rather than days.

As the Central Library project matures, ACS will have the foundation of a complete cardiology recordset, consisting of imaging, reports and discrete test data for all rated aviators; including an ECG library extending back nearly 60 years. This extensive volume of data will provide the USAF with profound research capabilities, all from one database.

About ScImage

Founded in 1993, ScImage, Inc. is a privately held company, headquartered in Los Altos, California. ScImage is a global leader in the development of advanced medical imaging and workflow solutions for radiology, cardiology, orthopedics, obstetrics and electronic medical record content management.

FOR IMMEDIATE RELEASE

As a true enterprise PACS company, ScImage's mission is to provide a shared infrastructure solution for all imaging intensive departments throughout the healthcare enterprise. At the center of ScImage's technology is PICOM, a web service technology that works independent of data types, modalities and departments to seamlessly deliver multi-modality image and information management, multi-PACS archiving, Cloud PACS services, offsite disaster recovery and telemedicine functionality. ScImage®, PICOM®, NetraMD®, ForeverOnline®, PicomOnline™, PicomWeb™, HyperStreaming™, OnDemand TelePACS™ and EPF™ are trademarks or registered trademarks of ScImage, Inc. For more information about ScImage and the PICOM family of products, visit their website at www.scimage.com or call 1-866-SCIMAGE.
