![ScImage - 20 Years of Imaging Ingenuity]

ScImage Debuts Cloud PACS Replete with Traditional PACS Functionality

PicomCloud provides a ubiquitous platform for imaging, reporting and multimedia objects, all in a web-vendible format.

Los Altos, CA – July 19, 2011 - Today, ScImage launched PicomCloud™, a complete, self-service Cloud PACS for radiology, cardiology and other clinical specialties.

Many Cloud PACS services introduced recently offer competent services for simple image forwarding, while others are limited to a specific clinical specialty, like radiology. PicomCloud is proficient in imaging, reporting and workflow management for radiology, cardiology, orthopedics, obstetrics, mammography and many other clinical settings.

PicomCloud is well-suited in the market where IT support is limited or cost prohibitive. PicomCloud account holders are relieved of the costly outlay and ongoing support costs of server hardware, data storage and network infrastructure required for a traditional PACS. The combination of ever-expanding network bandwidth, abundant processing power and relatively inexpensive storage, has created an environment where PACS buyers are more widely comfortable with, and reliant upon software-as-a-service.

ScImage's PicomCloud PACS simplifies deployment for customers, offers instant availability to the latest software revisions and virtually eliminates up-front costs.

This feature rich cloud PACS service provides professional utilities to automate the acquisition of exams to the cloud, delivers rich image visualization and sophisticated reporting, along with report delivery tools, primary care provider access and online account management.

The company's "Picom" trademark denotes Patient Information and Communication in Medicine, which expands on the DICOM concept of Digital Imaging and Communication in Medicine.

About ScImage

Founded in 1993, ScImage, Inc. is a privately held company, headquartered in Los Altos, California. ScImage is a global leader in the development of advanced medical imaging and workflow solutions for radiology, cardiology, orthopedics, obstetrics and electronic medical record content management. As a true enterprise PACS company, ScImage's mission is to provide a shared infrastructure solution for all imaging intensive departments throughout the healthcare enterprise. At the center of ScImage's technology is PICOM, a web service technology that works independent of data types, modalities and departments to seamlessly deliver multi-modality image and information management, multi-PACS archiving, Cloud PACS services, offsite disaster recovery and telemedicine functionality. ScImage®, PICOM®, PicomCloud™, ForeverOnline®, PicomOnline™, PicomWeb™, HyperStreaming™, OnDemand TelePACS™ and EPF™ are trademarks or registered trademarks of ScImage, Inc. For more information about ScImage and the PICOM family of products, visit their website at www.scimage.com or call 1-866-SCIMAGE.
