

FOR IMMEDIATE RELEASE

ScImage at RSNA 2011: Celebrate the Image

ScImage to showcase synchronous enterprise and cloud imaging as a managed service.

Los Altos, CA – November 21, 2011 - ScImage, Inc. (booth 6022) will be presenting a new paradigm in image-centric health IT, employing a blend of Enterprise PACS with Cloud PACS, together as a managed service. Beyond basic off-site storage, ScImage offers a complete cloud based PACS service for radiology, cardiology, orthopedics or other clinical specialties, including anywhere reporting.

ScImage's PicomCloud PACS is available in a managed-service model or as a self service, web-vendible image management system. ScImage's flagship PicomEnterprise can be used in synchrony with PicomCloud, or as an independent, web-enabled enterprise PACS.

The company's "PICOM" trademark denotes Patient Information and Communication in Medicine, which expands on the DICOM concept of Digital Imaging and Communication in Medicine.

About ScImage

Founded in 1993, ScImage, Inc. is a privately held company headquartered in Los Altos, California. ScImage is a global leader in the development of advanced medical imaging and workflow solutions for radiology, cardiology, orthopedics, obstetrics and electronic medical record content management. As a true enterprise PACS company, ScImage's mission is to provide a shared infrastructure solution for all imaging intensive departments throughout the healthcare enterprise. At the center of ScImage's technology is PICOM, a web service technology that works independent of data types, modalities and departments to seamlessly deliver multi-modality image and information management, multi-PACS archiving, Cloud PACS services, offsite disaster recovery and telemedicine functionality. For more information about ScImage and the PICOM family of products, visit their website at www.scimage.com or call 1-866-SCIMAGE.
