ScImage, Inc., Awarded U.S. Government's DIN-PACS Contract

Los Altos, CA – June 9, 2014 - ScImage, Inc., a leading provider of on premises, in the cloud or hybrid healthcare enterprise imaging and clinical workflow solutions has announced the U.S. government has awarded the company its DIN-PACS III (Digital Imaging Network/Picture Archiving and Communications System) contract. The contract continues for two years, worth a potential \$45 million USD.

"ScImage has provided innovative diagnostic imaging solutions to the U.S. government for a number of years. We are proud to have earned the DIN-PAC III and recognition as an enterprise PACS solution," said John Loucks, Government Programs Manager. "This award affirms our commitment to addressing the specialized needs of the DHA and VHA, and our ability to deliver solutions to complex imaging challenges."

The DIN-PACS III contract, extending through June 2016, includes imaging products, such as Picture Archiving and Communications Systems (PACS), diagnostic viewers, Vendor Neutral Archive (VNA), dynamic workload allocation, clinical structured reporting, universal HTML5 image viewers, consolidated worklist, mobile device support, integration services and support programs to be utilized by U.S. Federal agencies. The entire ScImage Picom365 Enterprise solution supporting Cardiology, Radiology, Orthopedics, Obstetrics and other non-DICOM diagnostic imaging solutions are available under the contract.

ScImage's prior contracts have included projects for the U.S. Department of Defense (DoD), the U.S. Department of Veterans Affairs (VHA), the U.S. Air Force School of Aerospace Medicine, Indian Health Service, and other agencies requiring DIN-PACS goods and services.

"We have invested heavily in understanding and developing solutions tailored to the specific requirements of individual government agencies and are committed to solving challenges faced with ever expanding health IT requirements. ScImage has proven its ability to provide an enterprise solution within the security and regulatory requirements of the DoD and VHA," said Sai Raya, PhD, President of ScImage Inc. "As an independent IT solutions provider with extensive diagnostic imaging expertise, we are uniquely qualified to provide vendor-agnostic, industry-leading interoperability solutions."

About ScImage

Founded in 1993, ScImage, Inc. is a privately held company headquartered in Los Altos, California. ScImage brings cost effective imaging strategies to institutions saddled with patched imaging silos and cobbled workflow. ScImage's PICOM365 technology unifies multi-department PACS, diagnostic reporting, VNA, universal viewing and collaborative reading into a powerful platform that can be delivered on premises, in the cloud or hybrid. ScImage is unique in the industry with a native diagnostic application suite that is advanced in Radiology, Cardiology, Orthopedics and OB-GYN. For more information about ScImage and the PICOM family of products, visit their website at www.scimage.com or call 1-866-SCIMAGE.
