

FOR IMMEDIATE RELEASE

Enhanced Nuclear Cardiology Workflow by ScImage

Partnership with CII Demonstrates Seamless Cloud Post-Processing Workflow

Los Altos, CA – September 10, 2019 – ScImage, Inc. is pleased to announce the implementation of Cardiac Imaging, Inc.’s mobile services and on-premise Stress-PET imaging and reporting at the American Society of Nuclear Cardiology’s 24th Annual Scientific Session.

Key to the success of the partnership between ScImage and CII, first announced at ASNC 2018, has been the ease of deployment of the solution. ECG Stress data and PET images are uploaded securely over the internet to ScImage’s PICOM365.com Cloud PACS solution. Physicians have full workflow available from the Cloud, including access to images, reporting and INVIA’s Corridor 4DM post-processing. Data is seamlessly integrated into providers’ medical records systems.

CII’s practice partners could not be happier with the results. “Our physicians’ eyes light up when they’re told they can read and report from anywhere. The ability to perform an exam without being tied to a workstation is too good to be true,” said Sam Kancherlapalli, CEO CII. “Doctors also comment on improved productivity as a result of automated workflow and intuitive, fast-paced development of customized reports.”

“Our partnership with Cardiac Imaging has given ScImage the ability to highlight our state-of-the-art Cloud capabilities for mobile and PET imaging workflows”, said ScImage’s founder and CEO, Sai Raya, Ph.D. “Imaging partners like CII are changing the care delivery system, and we are excited to be a part of it.”

To learn more, visit ScImage in booth 105 at this year’s American Society of Nuclear Cardiology’s 24th Annual Scientific Session held in Chicago, IL.

About ScImage

Founded in 1993, ScImage remains a customer-first, private company with a mission to provide innovative enterprise imaging solutions to the healthcare industry. ScImage’s unique single-database PICOM365 enterprise platform delivers end-to-end imaging workflow for Cardiology, Radiology, Women’s Health, Orthopedics, Ophthalmology and more. Scalable from a single physician practice to multi-hospital enterprises, PICOM365 is delivered on premises, in the cloud, or as hybrid - based on user choice. The perfect synchrony created between on-site and cloud resources allows PICOM365 to provide secure VPN-less image exchange solutions among legacy silo systems, cloud users, and various EHR systems.
