FOR IMMEDIATE RELEASE

## ScImage Successfully Completes Its SOC 2 Type 2 Report

*ScImage Demonstrates Commitment to Security, Confidentiality, and Availability*

**Los Altos, CA – April 11, 2023 –** ScImage, Inc., a prominent provider of cloud-based enterprise imaging, PACS, and workflow solutions for the healthcare sector, is delighted to announce that its PICOM365 Cloud enterprise image management system has successfully achieved SOC 2 Type 2 attestation. This accomplishment highlights ScImage's unwavering dedication to upholding the fundamental principles of security, confidentiality, and availability. By leveraging the robust security and monitoring capabilities inherent in the MS Azure platform and combining them with their own controls and years of information-security expertise, ScImage has created a reliable and secure system that is optimized for the unique needs of the healthcare industry.

As the healthcare industry continues to transition from on-premises to Cloud-based workflow, ScImage is seeing an increased demand for security compliance and documentation requests. Therefore, obtaining SOC 2 Type 2 attestation is evidence that ScImage will continue to expand their service commitments, system requirements and corporate policies to not only meet, but exceed the expectations of their customers and partners.

According to ScImage Founder and CEO, Sai Raya, Ph.D., "This SOC 2 Type 2 attestation is a reflection of our dedication to staying true to our core beliefs and providing our customers with the highest quality of security, confidentiality and availability."

Developed by the American Institute of Certified Public Accountants (AICPA), the SOC 2® Type 2 examination provides reasonable assurance to users about the suitability of the design of the company's controls placed into operation along with their operating effectiveness against the relevant Trust Services Criteria for a period. ScImage chose 360 Advanced, Inc., a licensed CPA firm, to perform the demanding third-party SOC examination.

**About ScImage**

PICOM365 is a specialized platform developed by ScImage, Inc. that enables organizations, ranging from small single-physician practices to large multi-hospital enterprises, to effectively manage complex diagnostic imaging and reporting workflows. Utilizing the Cloud as an exchange platform, PICOM365 can function completely on-premises or entirely in the Cloud, or any combination of the two. This solution provides secure VPN-less imaging workflow capabilities that connect legacy silo systems, DICOM or non-DICOM modalities, advanced AI applications, remote facilities, EHRs, and various third-party systems. ScImage takes pride in providing a comprehensive, role-based user experience that is accessible to all members of care teams, regardless of their location. Learn more at www.scimage.com.
