FOR IMMEDIATE RELEASE

ScImage Unveils "Meaningful AI" with PICOM365 Universal AI Connectivity Foundation

Empowering Healthcare Imaging with Seamless, Plug-and-Play AI Integration

Los Altos, CA – February 27, 2025 - ScImage, a pioneer in enterprise imaging, is enhancing its cloud PACS with the PICOM365 Universal AI Connectivity Foundation—a seamless, plug-and-play platform designed to help healthcare organizations integrate the AI solutions that truly meet their needs. As a trusted partner, ScImage remains committed to practical, customer-driven innovation that prioritizes patient care over monetization trends.

With its Meaningful AI approach, ScImage prioritizes clinical accuracy, workflow efficiency, and cost reduction over hype. PICOM365's open, vendor-neutral architecture ensures that any AI solution can be effortlessly deployed, maximizing both choice and flexibility for providers.

"AI in healthcare isn't about chasing trends—it's about making a real impact," said Sai Raya, Ph.D., CEO and Founder of ScImage. "With PICOM365's Universal AI Connectivity Foundation, we've built a future-proof imaging platform that enables AI to serve healthcare—not the other way around."

AI That Works — Seamlessly Integrated into Everyday Imaging Workflows

- **AI in Reporting:** Intelligent review catches discrepancies before they become problems.
- **AI in User Workflow:** Seamless prioritization and relevant priors integration for smarter decision-making.
- **AI in Machine Workflow:** Automated server health monitoring and self-healing ensure reliability.
- **AI for Department Leadership:** AI-driven peer review, billing reviews and real-time analytics for full operational oversight.
- **Best-of-Breed AI Integration:** Deploy any AI, on-prem or cloud, without disrupting workflows.
- **Middleware for AI Workflow:** Bridge AI and legacy systems for seamless, scalable adoption.

About ScImage

Founded in 1993, ScImage is a privately held leader in Cloud-centric enterprise imaging, PACS, and image exchange solutions for healthcare. Our flagship platform, PICOM365, streamlines intelligent imaging workflows with secure connectivity to DICOM and non-DICOM modalities, multiple locations, and third-party systems - including EHRs and AI - across on-premise, Cloud, or hybrid environments.
